## **Covid-19 Safety Protocols**

Thank you for bowling with us this season.

We are truly grateful that you are trusting us to provide a safe & fun experience this season. The health and safety of our guests and staff is our top priority, so please help us keep everyone safe (and help us stay in business) by following our new safety protocols.

### ***Masks:***

All bowlers & staff members must wear an appropriate face covering (above nose) at all times when in bowling center--even while bowling. This is non-negotiable and mandated by the state. We know it's not ideal to bowl while wearing a mask / face covering, but it's required and we cannot allow people to be in the center if they are not wearing a mask. There are no medical exemptions allowed--if you are not well enough to wear a mask, you are not well enough to be bowling.

### ***Social Distancing:***

Please maintain 6 feet of social distance between you and other guests at all time. Barriers are in place to maintain safe social distancing between teams. Due to our 50% capacity limits, spectators are not allowed.

### ***Food & Beverage:***

We are following all local & state mandates about food and beverage. You are permitted to remove your mask only when eating food or drinking a beverage. Per gov't guidelines, you must be seated. At no time should a patron be standing/walking while eating or drinking. Food & Beverage must be ordered and delivered by waitstaff. There must be food on table in order for alcohol to be served. Please remember to keep maintaining social distance while eating & drinking.

### ***Cleanliness:***

We've always prided ourself on being clean. All touch points (front desk, settees, ball returns, bathrooms, etc) are sanitized after each use, as well as rental shoes and bowling balls. All house balls are located behind the desk for sanitation purposes.

### ***Health & Wellness:***

If you feel like you have any symptoms / feel sick, please stay home--bowling can wait. A self-serve temperature check located in the entry-way vestibule for use. Please wash hands often and use sanitizer, which is available throughout the center. Please be kind & patient with one another as well.

Thank you again for helping us navigate all of this. We can't wait to get back to normal.
